

AFM Replacement Encoders From **Joral Devices**

Joral Devices has rugged duty replacement encoders for your AFM harvester head.

Joral Devices is offering military grade replacement encoders for the AFM harvester head. Our encoders are designed specifically for logging applications and are built to stand up under the extreme conditions of the timber industry.

Specifications

- 125 Pulses Per Revolution
- 6 to 30 VDC Supply Voltage
- 58 mm Outside Diameter
- 10 mm Shaft with Flat
- Easy-wire Connections for VDC, GND, A and B
- Built-in Over voltage and mis-wire Protection

Easy-wire Connector

Our Easy-wire connector makes wiring the replacement encoder as simple as possible. Our connector allows you to secure your wiring connections to a separate terminal block, as shown to the right, and then easily snap the block in place.

Ordering Information

This encoder is part of the J1 line of rugged duty rotary encoders manufactured by Joral Devices. Please use the following part numbers when ordering:

| Joral Devices P/N | Specifications |
|-------------------|----------------------------------|
| J1-AFM-58-125-10 | 58 mm shell, 125 ppr, 10mm shaft |
