

G&R Replacement Encoders

From Joral Devices

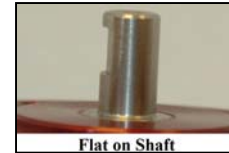

Joral Devices has rugged duty replacement encoders for your G&R processor head.

Joral Devices is offering military grade replacement encoders for the G&R processor heads. Our encoders are designed specifically for logging applications and are built to stand up under the extreme conditions of the timber industry. All our encoders have LED indicators for installation and diagnostics and are built to last!

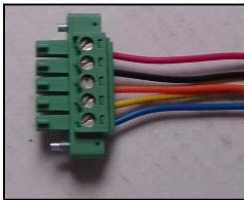

Specifications

- 200 or 256 Pulses Per Revolution
- 6 to 30 VDC Supply Voltage
- 2" diameter shell, 0.375" shaft with flat
- Easy-wire Connections for VDC, GND, A and B
- Built-in Over voltage and mis-wire Protection

Easy-wire Connector

Our Easy-wire connector makes wiring the replacement encoder as simple as possible. Our connector allows you to secure your wiring connections to a separate terminal block, as shown to the right, and then easily snap the block in place.

Optionally, Joral Devices can provide pig-tail wires at the proper length for your installation.

Ordering Information

This encoder is part of the J1 line of rugged duty rotary encoders manufactured by Joral Devices. Please use the following part numbers when ordering:

Joral Devices P/N	Specifications
J1-GR-2-200-375	2" shell, 200 ppr, 0.375" shaft with flat
J1-GR-2-256-375	2" shell, 256 ppr, 0.375" shaft with flat
