

Quadco Replacement Encoders From Joral Devices

Joral Devices has rugged duty replacement encoders for your Quadco harvester head.

Joral Devices is offering military grade replacement encoders for the Quadco harvester head. Our encoders are designed specifically for logging applications and are built to stand up under the extreme conditions of the timber industry.

Specifications

- 100 Pulses Per Revolution
- 6 to 30 VDC Supply Voltage
- 58 mm Outside Diameter / 10 mm Shaft with Flat
- 4-pin Circular or Easy-wire Connections for VDC, GND, A and B
- Built-in Over voltage and mis-wire Protection

4-Pin Circular or Easy-wire Connector

Our encoder can be ordered with the standard 4-pin circular connector or with the Joral Easy-wire connector.

The 4 pin circular will mate with the wiring as originally supplied.

Optionally, our Easy-wire connector is used in place of the original equipment wiring. This connector allows you to secure your wires to a separate terminal block and then easily snap the block in place.

Ordering Information

This encoder is part of the J1 line of rugged duty rotary encoders manufactured by Joral Devices. Please use the following part numbers when ordering:

Joral Devices P/N	Specifications
J1-Quadco-58-100-4C	58 mm shell, 100 ppr, 10mm shaft, 4-pin circular connector
J1-Quadco-58-100-5E	58 mm shell, 100 ppr, 10mm shaft, 5-pin Easy-wire connector
