

Timberjack Replacement Encoders From **Joral Devices**

Joral Devices has rugged duty replacement encoders for your Timberjack harvester head.

Joral Devices is offering military grade replacement encoders for the Timberjack harvester head. Our encoders are designed specifically for logging applications and are built to stand up under the extreme conditions of the timber industry.

Specifications

- 125 Pulses Per Revolution
- 6 to 30 VDC Supply Voltage
- 30 mm Outside Diameter (also available in 68 mm)
- 6 mm Shaft with Flat
- 4 pin Circular or Easy-wire Connector (also available with pig-tail)
- Built-in Over voltage and mis-wire Protection

Connector Options

Our encoder can be ordered with the standard 4-pin circular connector, with the Joral Easy-wire connector, or with pig-tail wires to terminate as you wish.

The 4 pin circular will mate with the wiring as originally supplied.

Optionally, our Easy-wire connector is used in place of the original equipment wiring. This connector allows you to land your wires to a separate terminal block and then easily snap the block in place.

Joral Devices can provide pig-tail wires at the proper length for your installation.

Ordering Information

This encoder is part of the J1 line of rugged duty rotary encoders manufactured by Joral Devices. Please use the following part numbers when ordering:

Joral Devices P/N	Specifications
J1-Timberjack-30-125-4C	30 mm shell, 125 ppr, 6mm shaft, 4-pin circular connector
J1-Timberjack -30-125-4E	30 mm shell, 125 ppr, 6mm shaft, 4-pin Easy-wire connector
J1-Timberjack -30-125-4P	30 mm shell, 125 ppr, 6mm shaft, 4-wire pig-tail
