

Valmet Replacement Encoders From Joral Devices

Joral Devices has rugged duty replacement encoders for your Valmet harvester head.

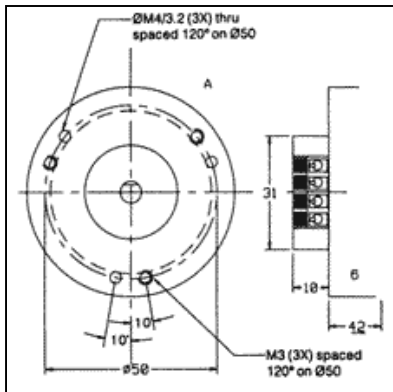

Joral Devices is offering military grade replacement encoders for the Valmet harvester head. Our encoders are designed specifically for logging applications and are built to stand up under the extreme conditions of the timber industry.

Specifications

- 80 Pulses Per Revolution
- 6 to 30 VDC Supply Voltage
- 58 mm Outside Diameter
- 6 mm Shaft with Flat
- Easy-wire Connections for VDC, GND, A and B
- Built-in Over voltage and mis-wire Protection

Easy-wire Connector

The diagram to the left shows the dimensions and the connector of the encoder as installed by the manufacturer. The Joral encoder has an identical mounting hole pattern. Our Easy-wire connector is used in place of the one show in the diagram. Our connector allows you to secure your wiring connections to a separate terminal block, as shown to the right, and then easily snap the block in place.

Ordering Information

This encoder is part of the J1 line of rugged duty rotary encoders manufactured by Joral Devices. Please use the following part number when ordering this encoder: 58mm diameter, 80 ppr, and 6mm shaft.

Joral Devices P/N	Specifications
J1-Valmet-58-80-6	58 mm shell, 80 ppr, 6 shaft
